

ESHWAR SAI

Frontend Engineer — React · TypeScript · Micro-Frontend · Vite · Next.js
Bengaluru, Karnataka | +91 6363824367 | eshwarsairam7@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Frontend Engineer with 3 years of experience building enterprise trading and financial platforms using React, TypeScript, Redux, Vite, and Next.js. Specializes in Micro-Frontend and Monorepo architecture (Webpack 5 Module Federation), and in performance optimization (30% load-time reduction via code splitting, lazy loading, bundle optimization). Currently building IPO investment workflows at Nuvama Wealth. Open to React Native, Java/Spring Boot backend, and Forward Deployed Engineer (FDE) roles.

TECHNICAL SKILLS

Frontend: React, Next.js, React Native (open to), TypeScript, JavaScript (ES6+), Redux, Redux Toolkit, Zustand, Context API, TanStack Query

Architecture & Tooling: Micro-Frontend, Module Federation, Monorepo, Webpack 5, Vite, GitHub Actions

Styling: Tailwind CSS, shadcn/ui, SCSS, Styled Components, MUI, Bootstrap

Performance: Code Splitting, Lazy Loading, Bundle Optimization, Reusable Component Design

Backend (learning): Java, Spring Boot, Python

Tools: Git, GitHub, Postman, Swagger, Figma, Chrome DevTools

OPEN TO

React / Next.js Frontend · React Native Mobile · Java / Spring Boot Backend · Forward Deployed Engineer (FDE) · Full-Stack roles

PROFESSIONAL EXPERIENCE

Nuvama Wealth (formerly Edelweiss Wealth Management) — Bengaluru

Software Development Engineer II

Jun 2025 – Present

- Build two React/TypeScript Micro-Frontend applications (NCD-IPO, IPO Platform) within a Module Federation + Vite architecture enabling independent deployment across teams.
- Own end-to-end IPO investment journeys — routing, product bouquet, orderbook, transaction flows — serving CXO, Relationship Manager, Partner, and Client segments.
- Design reusable component architecture with shadcn/ui and Tailwind CSS, adopted across both MFE apps to reduce duplicate UI development.
- Manage server-state and async data with TanStack Query (React Query) for cache-first data fetching across investment workflows.
- Partner with Product, QA, Design, and Backend in Agile sprints to ship investment-platform features on schedule.

Nuvama Wealth — Bengaluru

Software Engineer

Oct 2024 – May 2025

- Built and maintained real-time WebSocket integrations delivering live market and trading data on the Nuvama Wealth Broking web platform.
- Improved page load performance by 30% through image optimization, code splitting, and lazy loading; migrated bundling from Webpack to Vite for faster DX and build times.
- Developed scalable, reusable frontend modules for enterprise financial apps and mentored junior developers on best practices.
- Improved cross-browser compatibility and collaborated with backend teams on REST API integration for seamless data flow.

Nuvama Wealth — Bengaluru

Associate Software Engineer

Oct 2023 – Sep 2024

- Built responsive trading dashboards and financial workflows using React, TypeScript, Redux, and Zustand across APICollect, Partners Documentation Portal, and Nuvama Web & Mobile.
- Integrated REST APIs with backend teams to ensure seamless data flow across web and mobile platforms.
- Delivered reusable UI components that improved maintainability across multiple business modules.
- Participated in code reviews, debugging, and performance optimization in Agile delivery with Product, QA, and Design.

SELECTED PROJECTS

Algo Trading Automation Platform — Live on DigitalOcean

- Automated options trading platform for Indian markets with live order execution on a self-managed DigitalOcean Linux server.
- Strategies driven by Open Interest analysis, option chain snapshots, and positional trading logic with stop-loss/target management.
- Broker API integrations with retry handling, logging, and live monitoring; scalable architecture for multiple concurrent strategies.

EDUCATION

Bachelor of Engineering, Mechanical Engineering

Bangalore Institute of Technology (VTU) CGPA 8.1 / 10.0 | 2019 – 2023
